

Rainwater Basin Joint Venture COST-SHARE PROGRAMS

Cost-share and conservation programs that include annual payments can make the income from marginal acres more consistent and predictable. Nebraska's conservation partners work together to ensure that agriculture producers across the state have an opportunity to consider projects or programs that benefit their operation while also creating habitat for wildlife.

Working Lands Program

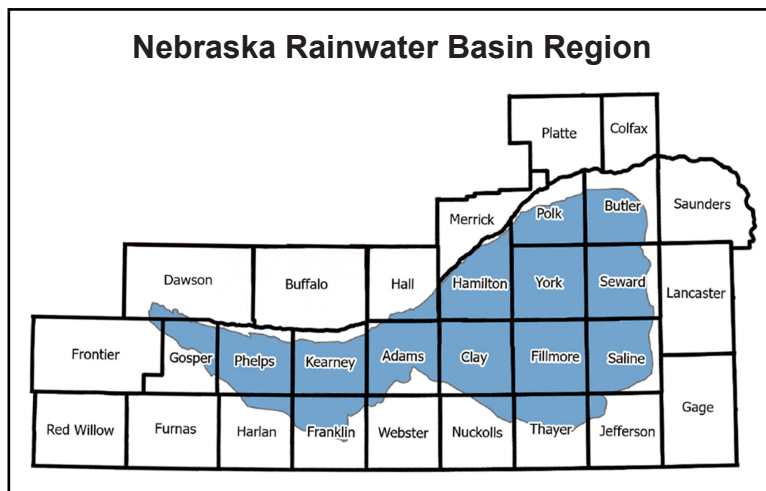

- Fence Installation
- Pivot Modification
- Livestock Watering Facilities
- Well Drilling
- Prescription Irrigation
- Irrigation Re-Use Pit Fills

Habitat Management Projects

- Wetland Restoration
- Upland Buffer Establishment
- Mechanical Tree Removal
- Herbicide Treatment
- Prescribed Burning
- Disking

Cost-share up to 85% is available for grazing infrastructure, pivot modifications, and prescription irrigation. Cost-share up to 100% is available for irrigation reuse pit fills and habitat management.

WHAT WE DO

- Enhancing wildlife for 10 million migratory birds.
- Balancing the needs of agriculture and conservation.
- Preserving year-round recreational activities.
- Improving existing habitat for future generations.
